

LIST OF CURRENT CLAIMS

1. (Currently Amended) An integrated device for testing tone quality of a plurality of microphones, comprising:

[[A]] a main body;

[[A]] a control panel mounted on said main body and provided with a plurality of receiving holes for receiving a plurality of microphones, said control panel further provided with a plurality of switches corresponding in location to said receiving holes, and a plurality of light-emitting diode (LED) indicator lamps corresponding in location to said receiving holes and said switches;

wherein one of said plurality of switches is activated to light up a corresponding LED indicator lamp for testing tone quality of a selected microphone.

2. (Canceled)

3. (Currently Amended) The integrated device ~~as defined in~~ of claim 1, wherein said plurality of switches ~~[[are of]]~~ have a keyboard construction.

4. (Currently Amended) ~~The integrated device as defended in claim 1,~~ An integrated device for testing tone quality of a plurality of microphones, comprising:

a main body;

a control panel mounted on said main body and provided with a plurality of receiving holes for receiving a plurality of microphones, said control panel further provided with a plurality of switches corresponding in location to said receiving holes;

wherein said main body is provided with a plurality of racks for holding a plurality of earphones for use in evaluating the tone output of a microphone under test.
